Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/791,529

Applicant(s)

AREH ET AL.

Examiner

Bena Miller

Art Unit

3725

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 December 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-6, 11 and 12 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-6 and 11 is/are rejected.
- 7) ☒ Claim(s) 12 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-8508)
- 4) ☐ Interview Summary (PTO-413)
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____
- Paper No(s)/Mail Date _____

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6 and 11 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Areaux et al (US Patent 4,186,096) in view of Mikina (US Patent 2,552,572).

Areaux et al teach most of the elements of the claimed invention including a cylindrical outer wall housing (10) with a recess defining an opening, a drive unit (12), a projection (12) matching a shape of the opening and projecting outwardly from the drive unit and through the openings, the projection engaging the opening to securely mount the drive unit (fig. 2), the opening have a given height and the projections formed of resilient elements being slightly oversized (fig.2), a radially extending wall running in radial direction, said recesses having a recessed cylindrical wall, and said openings occupying at least part of said recessed cylindrical wall and part of said radially extending wall running in radial direction (fig. 2), a projecting lugs (19), lead-in-bevels (see marked copy of figure 2) and a rotating element (11). However, Areaux et al fail to teach the projection projecting in a direction perpendicular to the vertical axis of the drive unit and a second recess. It would have been obvious to one having ordinary skill

Art Unit: 3725

in the art at the invention was made to incorporate a second recess in the device of Areaux, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8. It should be noted that cylindrical wall may comprise a cylindrical side wall, a flat top wall and a flat bottom wall as noted in the previous Office Action.

Mikina teaches an appliance having a mounting projection (14, 20 and 18) perpendicular to the vertical axis. It would have been obvious to one of ordinary skill in the art to having the projection of Areaux projecting in a direction perpendicular to the vertical axis of the drive unit, as suggested by Mikina, for the purpose of allowing easy removal of internal components due to wear.

Figure 2 of Areaux et al

Lead-in-bevels

Claim 5 is finally rejected under 35 U.S.C. 103(a) as being unpatentable over Areaux et al (US Patent 4,186,096) in view of Mikina (US Patent 2,552,572) as applied to claim 1 above, and further in view of Truitt (US Patent 2,138,716).

Areaux et al and Mikina teaches most of the elements of the claimed invention except for a strip having a height and running in axial direction at the inner side of the cylindrical wall. Truitt teaches a food processor with a strip (17) for insertion of the drive unit. Therefore, it would have been obvious to one skilled in the art at the time the

Art Unit: 3725

invention was made to provide Areaux et al and Mikina with a strip for insertion of the drive unit, as taught by Truitt.

Allowable Subject Matter

Claim 12 is finally objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bena Miller whose telephone number is 571.272.4427. The examiner can normally be reached on Monday-Friday.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
